End Lat/Lon: 33.9815 / -78.5941

Survey Summary:

A small tornado associated with Tropical Storm Debby's rainbands started near Ash Little River Road NW, where it caused a concentrated area of damage at a large property. Several Bradford Pear trees were uprooted or snapped along the property's driveway. Large limbs were also snapped in a stand of trees northwest of the driveway and minor damage to fencing and the removal of one panel of flashing near the home's roof was also found. The tornado likely continued northwestward into a dense forest based on the persistence of a tornado debris signature detected by a weather radar located approximately 10 miles east of the tornado.
