

Regional Climate Summary

June 2019

Weather Forecast Office
Midland/Odessa, TX

Issued August 4, 2021 12:28 AM CT

June picked up where May left off with several days of severe weather across the region including numerous hail storms, a few tornadoes, and a massive dust storm. The eastern Permian Basin, southeast New Mexico, and mountain areas of West Texas received above normal rainfall, while the central Permian Basin missed out on most of the storm activity. Midland Int'l was dry for 26 days straight and recorded a meager 0.28" of rainfall which ranked as the 10th driest June total. Average temperatures were at or slightly below normal across the area, but there was a hot stretch from the 19th-25th where high temperatures climbed to the mid 100s in the Permian Basin to over 110°F along the Rio Grande. The month ended with dry weather and temperatures near normal.

Midland Int'l Airport June Statistics:

- Hottest Day: 107°F on the 20th
- Coolest Night: 59°F on the 6th
- Average Temperature: 81.1°F (Normal: 80.3°F)
- Precipitation Total: 0.28" (Normal: 1.80")
- Average Wind Speed: 11.9 mph
- Highest Wind Gust: 45 mph on the 5th
