

Coastal Flood Safety Tips

- Coastal flooding can be a very dangerous situation. Know if your location is prone to coastal flooding and the prevailing wind direction that will result in flooding at your location.
- If water levels begin to rise, be prepared to evacuate the area immediately. Rising flood waters can cover roadways and cut off your evacuation route, and prevent emergency services personnel from reaching you.
- Do not attempt to drive across flooded roadways. The water may be deeper than it appears, or the road beneath may be washed out.

Turn around, don't drown!
