Lake Caroline	37.9741	-77.521	Caroline	VA	2254	8	8	2024	EF-1	<p>Around 654 PM a thunderstorm in a rain band associated with Tropical Depression Debbie produced a short lived tornado that initial touched down near Cedar Fork Road about 1 mile west of US Route 1 near Golansville. The tornado snapped and uprooted several pine trees in this location before entering a densely wooded forest to the north. About 6/10 of a mile to the northeast, the tornado entered the Lake Caroline Subdivision near the intersection of Senate Dr and Kennedy Cove. Numerous trees were snapped and uprooted. As the tornado continued to travel NNW it continued to knock down additional trees, with numerous house along Loyalist Dr, American Dr, West Point Dr, Woodlyn Dr, Powder Horn Dr and Admiral Dr receiving roof and siding damage from trees falling on houses. In all more than 30 houses were damaged from falling trees and powerlines were done through out the community. After crossing the west end of Lake Caroline, the tornado began to weaken with just a few more trees being knock down along Lake Caroline Rd and Waring drive before dissipating.</p> <p>We would like to thank Caroline County Emergency Management with their assistance in completing this damage survey.</p>

**Latest Update:** 08/11/2024
