

Severe Storm Timing Guidance - Time Series Graphics

22 May 2024 Severe Weather Outlook Hot Springs, Arkansas

Created: 9:36 AM

The graphic shows the expected timing of the risk levels and the lines indicate the chances of **tornadoes**, **damaging winds** and **hail 1+ inch in diameter** occurring.

Shows the time period the outlook is valid for and the **categorical (highest) risk level** for the outlook

Indicates which hazard(s) is(are) driving the Categorical Risk

If there is a significant severe potential, the type of risk will be noted here...

- EF2+ tornadoes
- 75+ mph winds
- 2+ inch diameter hail

...otherwise it will be blank

Time of local sunset is marked by the vertical bar
