Storm Data and Unusual Weather Phenomena - April 2024

## Storm Data and Unusual Weather Phenomena - April 2024

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/10/24 11:10 CST		0	Thunderstorm Wind (EG 61 kt)
	04/10/24 11:12 CST		0	Source: NWS Employee

High winds downed a large tree on the campus of the University of South Alabama.

MOBILE COUNTY 2.7 N GEORGETOWN [30.92, -88.27], 2.8 N GEORGETOWN [30.9	92, -88.28]	
04/10/24 11:20 CST	0	Tornado (EF1, L: 0.19 mi , W: 25 yd)
04/10/24 11:21 CST	0	Source: NWS Storm Survey
Brief EF-1 tornado begun on Brighton Ct removing a home's roof. It		
appears the roof was removed due to a garage door failure leading		
to almost complete removal. An exterior wall in the garage was		
bowed out; however, a lower wind speed was assigned due to the		
failure mode being the garage door and absolute lack of any other		
damage surrounding the house. The tornado then crossed northwest		
across Brighton Dr and dissipated near Brandy Ct while snapping some		
large hardwood branches and a fence blown inward resulting in a		
convergent path.		
MOBILE COUNTY 3.0 SSW (BFM)MOBILE BROOKLEY [30.58, -88.07]
