End Lat/Lon:	41.9347 / -71.369

Survey Summary:

A tornado touched down near Breakneck Hill Road in Lincoln, RI and traveled to the east-northeast. A number of large hardwood trees were uprooted, some of which fell onto homes and other structures in both Lincoln and Cumberland, RI. The tornado reached maximum intensity of around 100 mph in a few locations. Other trees were topped and snapped well above the ground. The maximum width of the tornado was around 100 yards. The tornado continued to produce tree damage through Cumberland, RI across the state line into North Attleboro, MA where it continued to snap and uproot trees before lifting in the vicinity of Cushman Road.

The National Weather Service would like to thank the Rhode Island Emergency Management Agency, the Massachusetts Emergency Management Agency, and emergency services officials in the towns of Lincoln, Cumberland, and North Attleborough for their assistance.

Rehoboth MA - EF-1 Tornado

Rating: EF1
Estimated Peak Wind: 90 mph
Path Length /statute/: 0.55 miles
Path Width /maximum/: 50 yards
Fatalities: 0
Injuries: 0

Start Date: 06/26/2024
Start Time: 11:29 PM EDT
Start Location: Rehoboth / Bristol County / MA
Start Lat/Lon: 41.8018 / -71.2939

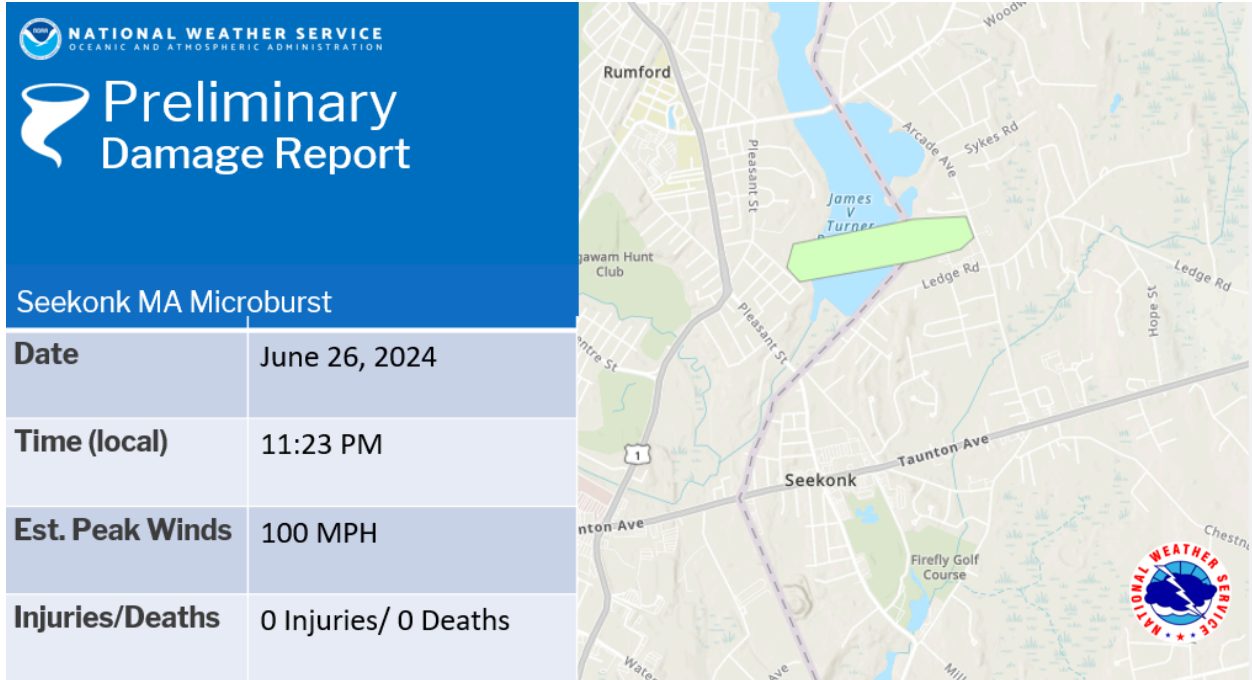

End Date: 06/26/2024
End Time: 11:30 PM EDT
End Location: Rehoboth / Bristol County / MA
End Lat/Lon: 41.8037 / -71.2836

Survey Summary:

A tornado touched down in a wooded area west of Steber Way in Rehoboth, MA. A number of large hardwood and softwood trees were snapped and uprooted in the woods and in several yards along the path. Otherwise, there was no significant damage to homes. The tornado reached a maximum intensity of 90 mph. The maximum width of the tornado was 50 yards. This was a very short lived tornado which was only on the ground for one minute.

The National WeatherService would like to thank the Massachusetts Emergency Management Agency and Emergency Management in Rehoboth for their assistance.

Seekonk MA - Microburst

Damage was surveyed in Seekonk, MA and determined to be the result of a microburst. Straight line winds were estimated to be 100 mph. This uprooted and snapped many trees in a wooded area between James V Turner Reservoir and Seekonk High School. At the high school the winds downed trees in a courtyard which caused damage to the roof. The microburst occurred at 11:23 PM based upon radar and was embedded in a larger area of strong wind causing scattered damage in the surrounding area.
