 Meteorologist in Charge
 Weather Forecast Office Burlington, VT

Subject: Establishment of action stage, as well as minor,
 moderate and major flood stages for the stream
 gauge at Hogansburg, NY on the St. Regis River
 (SREN6)

Effective at 1200 Coordinated Universal Time on Thursday, December 5, 2024, the National Weather Service will establish action stage, as well as minor, moderate and major flood levels above Gauge Zero for the stream gauge at Hogansburg, NY (SREN6) on the St. Regis River. Those are listed below. Flood stages for this gauge were previously undefined.

Action Stage (Bankfull)	19.0 feet
Minor Flood Stage	21.0 feet
Moderate Flood Stage	23.0 feet
Major Flood Stage	25.0 feet

These new flood stages and accompanying impact statements will help enhance local situational awareness during future high water events. The establishment of these levels are part of a recent evaluation of the floodplain and high water impacts with St. Regis Mohawk Emergency Management.

The National Weather Service welcomes public feedback. If you have any questions or comments on this change, please contact:
