## Event Summary

Hurricane Idalia made landfall on the early morning of August 30 in the big bend area of Florida, then move into the forecast area during the afternoon and evening after having weakened to a tropical storm. The most significant impacts for the area were due to flooding as a result of 7-13 inches of rainfall across portions of Orangeburg and Clarendon Counties. Isolated tree damage and power outages were also experienced across eastern portions of the Midlands and CSRA.

*NOTE: It is unlikely that the point-based observations provided in this report sampled the peak values for the event.*
