14. STATEMENT OF REQUIREMENT, PROBLEM, OR DEFICIENCY OF EXISTING SYSTEM

Twelve new sub-channels were created on the NESDIS GEONETCast Americas (GNCA) satellite broadcast service to implement service backup for the public Internet-based GTS Internet File Service (GIFS). Twelve designated telecommunication lines (Lines 81-92) are configured to send products to the GNCA Uplink Hub, using Secure File Transfer Protocol (SFTP). This RC identifies each of the WMO headers and the appropriate NWSTG line number to be used for the transmission of these products to the Uplink Hub. In completing the activities identified in this RC, the NWS approved dissemination requirements identified in the Operations and Services Improvement Process (OSIP) project 10-021, Continuation of the International Satellite Communications System (ISCS), will be completed.

15. KNOWN OR PROPOSED SOLUTION

Add the products listed to lines 81-92 as appropriate, to implement dissemination backup services for GIFS. Activate routing no earlier than at 0900 EDT, April 20, 2015.
