| NWS FORM E-5 U.S. DEPARTMENT OF COMMERCE HYDROLOGIC SERVICE AREA: NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION SERVICE SAN JOAQUIN VALLEY - HANFORD , CA REPORT FOR: MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS | NATIONAL WEATHER MONTH: JANUARY YEAR: 2004 |
| TO: Hydrometeorological Information Center, W/OH12x1 National Weather Service/Office of Hydrology 1325 East-West Highway #7116 Silver Spring, MD 20910 | SIGNATURE: Kevin Durfee (In Charge of Hydrologic Service Area) |

DATE: February 5, 2004

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts and hydrologic products issued (WSOM E-41).

☒ An **X** inside this box indicates that no flooding occurred for the month within this hydrologic service area.

No flooding occurred in the San Joaquin Valley HSA during January, 2004.

The storm track resided across the Pacific Northwest for much of the month while an upper level ridge of high pressure stayed in control of the pattern across central California. As a result, precipitation averaged well below normal throughout the HSA. In fact, measurable precipitation only fell on four days of the month in the San Joaquin Valley.

No hydrologic products were issued this month.
