| **X** | An **X** inside this box indicates that no flooding occurred for the month
+---+ within this hydrologic service area.

The month was much drier and warmer than normal, especially after the first week. In fact, the only measurable precipitation fell on the 4th as a rather deep upper level trough moved across the state. Afterward, the weather pattern was bone dry across the HSA as the storm track retreated northward for the season.

NO HYDROLOGIC PRODUCTS WERE ISSUED THIS MONTH.
