

REPORT FOR:
MONTHLY REPORT OF RIVER AND
FLOOD CONDITIONS

MONTH: **November** YEAR: **2021**

TO: Hydrometeorological Information Center, W/OH12x1
National Weather Service/Office of Hydrology
1325 East-West Highway #7116
Silver Spring, MD 20910

SIGNATURE: Colin McKellar
(In Charge of Hydrologic Service Area)

DATE: December 20th, 2021

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts and hydrologic products issued (WSOM E-41).

| X | An **X** inside this box indicates no flooding occurred for the month within this hydrologic service area.
+---+

Precipitation was well below average across the entire HSA for November. In fact, a majority of the area received less than 25% of normal precipitation (Fig. 1). There were also no significant river rises along any main stem river, including our five forecast locations. Lastly, drought conditions did not improve in November, with a majority of the HSA remaining under exceptional (D4) drought status (Fig. 2).

HYDROLOGIC PRODUCTS ISSUED THIS MONTH
