

POST TROPICAL CYCLONE REPORT

Storm Name	Hurricane Francine
NWS Office	Lake Charles, LA
Begin/End Date	09/10/2024 - 09/12/2024
Fatalities	0 - Direct 0 - Indirect
Tornadoes	0

Event Summary

Hurricane Francine made landfall near the mouth of the Atchafalaya River near the St. Mary & Terrebonne Parish line about 30 miles south-southwest of Morgan City, Louisiana at 5 PM CDT September 11th with maximum sustained winds of 100 mph and a minimum central pressure of 972 millibars. After landfall, Hurricane Francine slowly weakened, downgraded to a tropical storm over Lake Maurepas by 10 PM CDT, and turned more northward, weakening to a tropical depression by 7 AM CDT September 12th between Jackson and Hattiesburg, Mississippi. Sustained tropical storm force winds occurred across South Central Louisiana (Acadiana) roughly south and east of a line from Intracoastal City to New Iberia, Louisiana. Sustained hurricane force winds and gusts were mainly confined to the northern and western eyewall passage across St. Mary and Lower St. Martin Parishes. Moderate storm surge flooding occurred across coastal St. Mary Parish, with minor storm surge flooding across coastal Iberia, Vermilion & Cameron Parishes, as well as coastal Jefferson County.

NOTE: It is unlikely that the point-based observations provided in this report sampled the peak values for the event.
