

WEEKLY WEATHER BRIEFING

2:00 PM CDT

Thursday, June 27, 2024

Prepared by:

NWS New Orleans/Baton Rouge

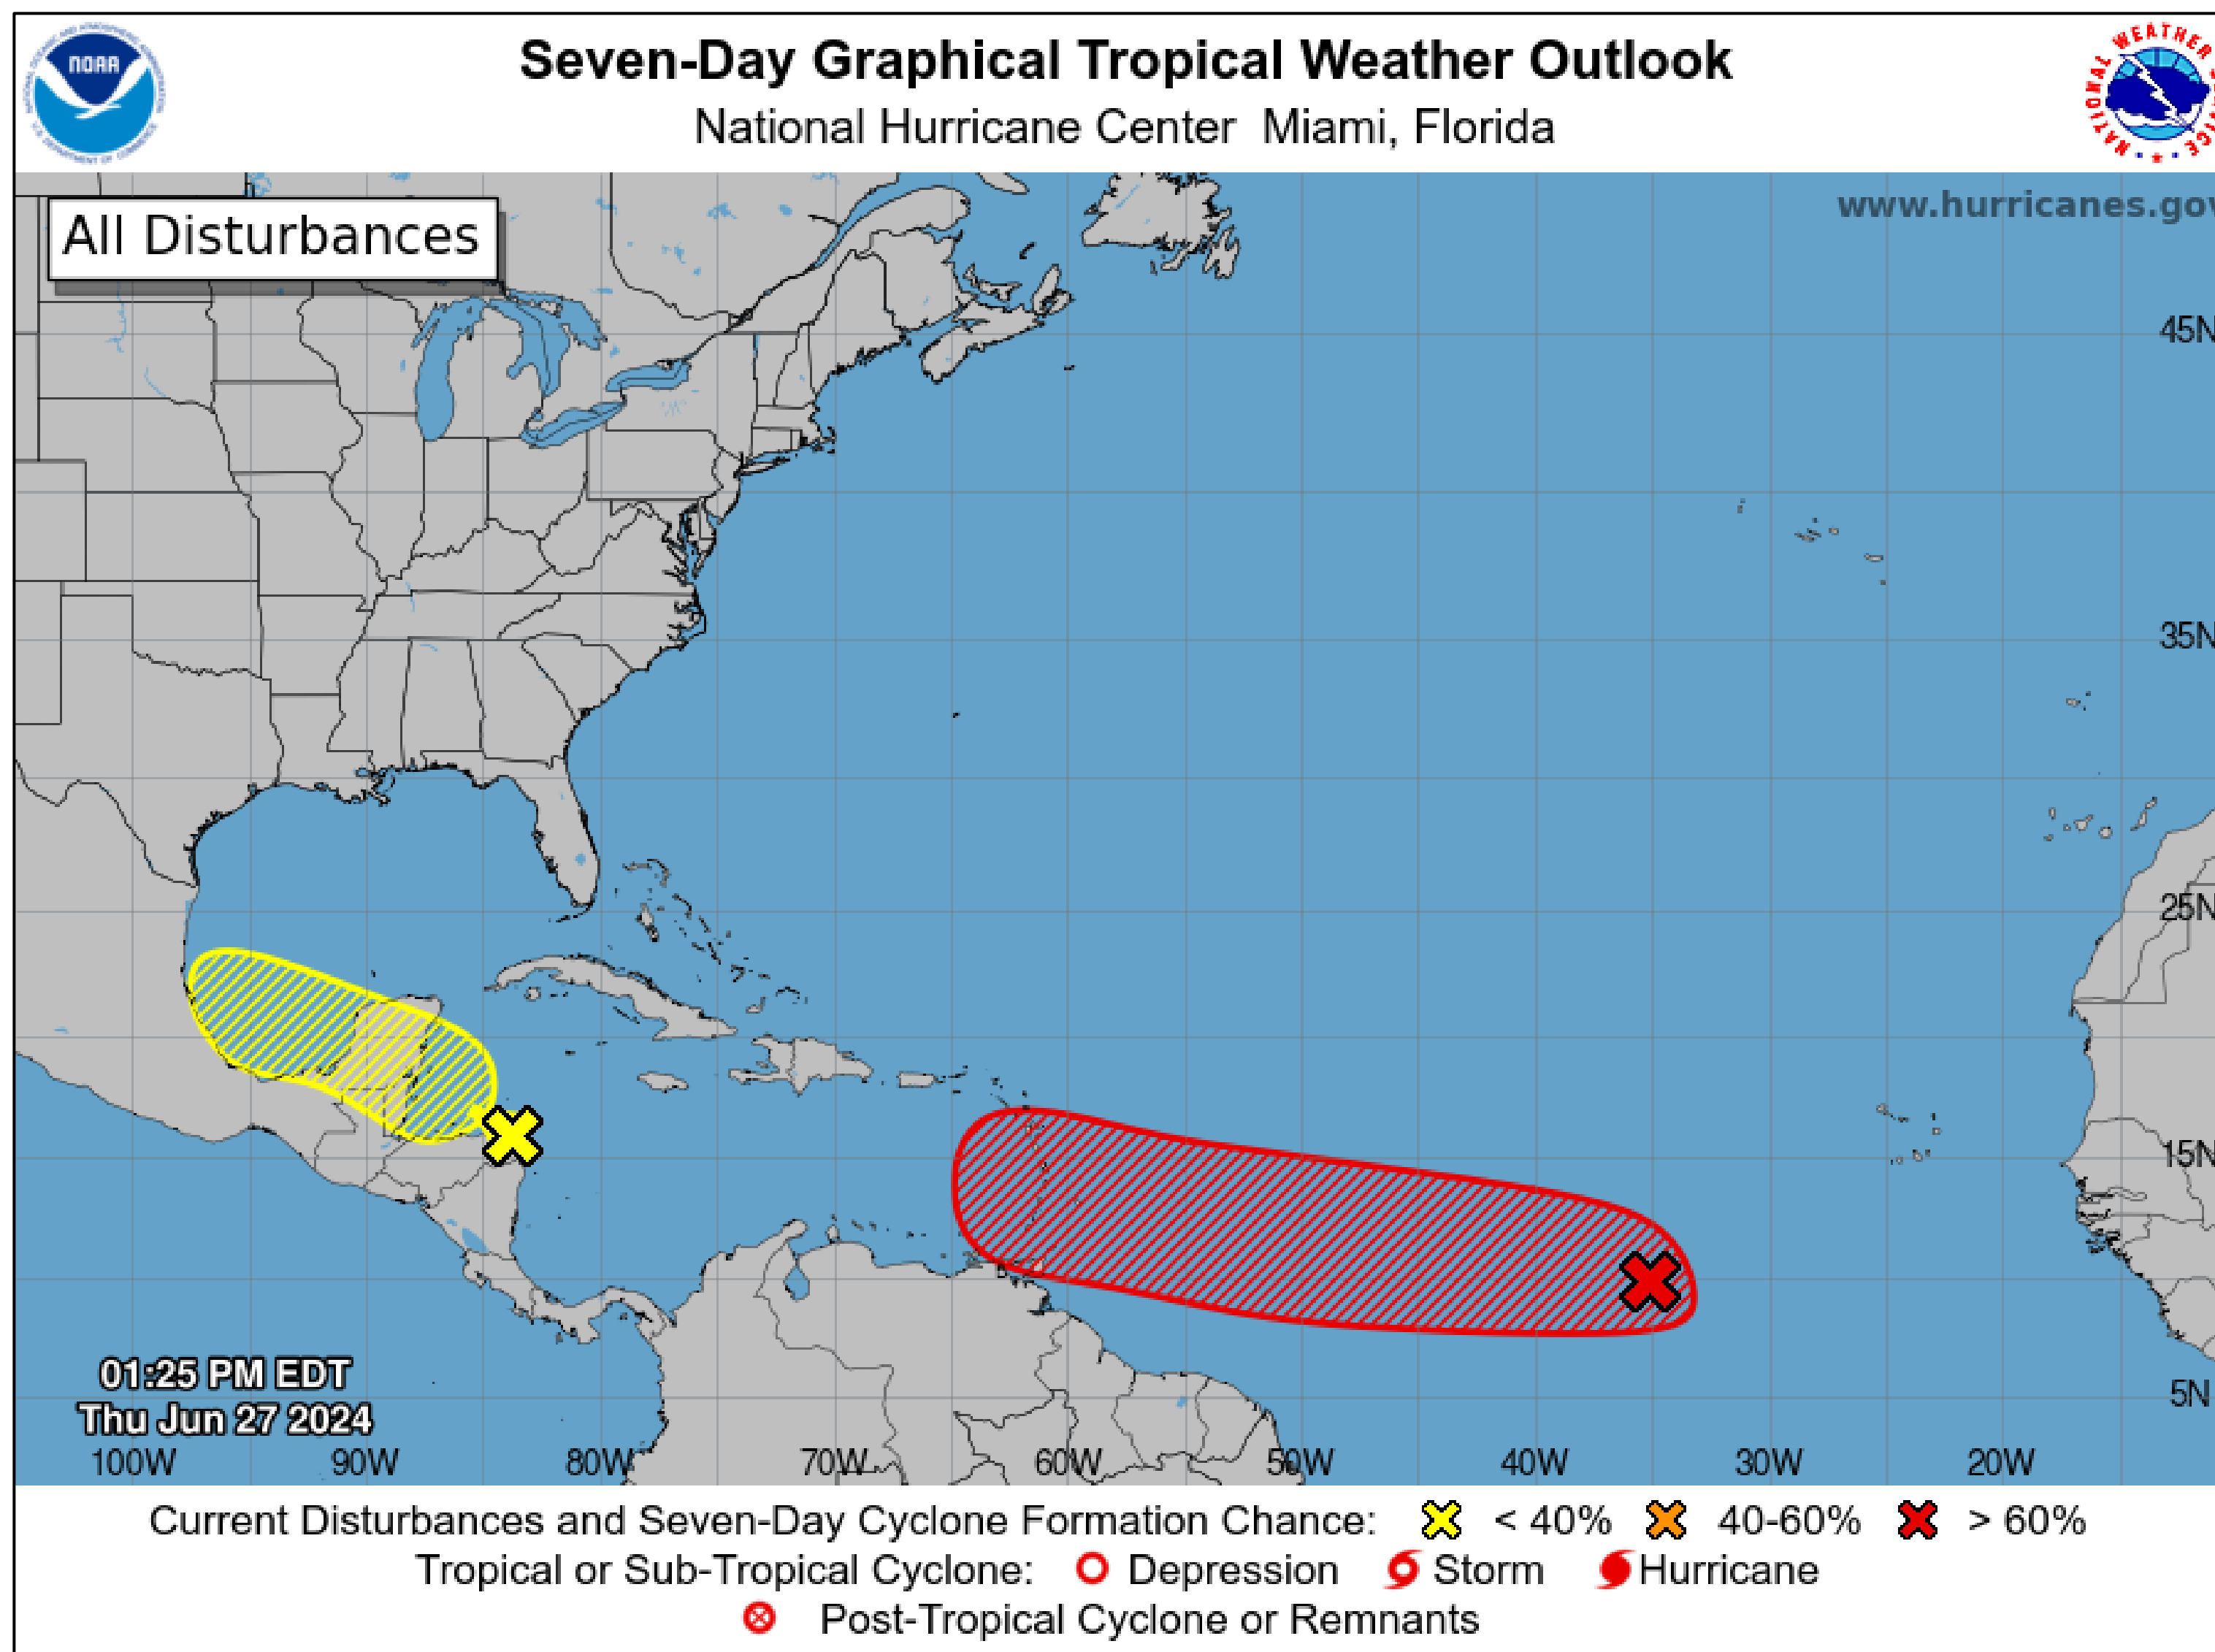

Situation Overview

- Two systems to monitor in the Atlantic.
- Dangerous heat indices this upcoming weekend, especially into next week.
- Daily hit-or-miss rain chances continue, few storms may be strong or produce isolated flash flooding.
- Heat stays up looking beyond into late next week.

Tropical Weather Outlook

Two areas to monitor:

- **Area 1: LOW (30%)** chance of development next 7 days
 - Likely staying south in the southern Gulf, impacting Mexico.
- **Area 2: HIGH (80%)** chance of development next 7 days.
 - Plenty of time to monitor track/trends as the system is around 5 days out from entering the Caribbean.
 - Check back for updates.
- Otherwise, no local impacts expected in the next 7 days
