| 08/27/24 17:06 CST 0 Thunderstorm Wind (MG 70 kt) 08/27/24 17:06 CST 0 Source: Emergency Manager in collaboration with local police and emergency management, it was determined that extensive storm damage across the northwest side of Wauconda was caused by a microburst with wind speeds of at least 80 mph. Extensive tree damage resulted in road closures and trees fell on at least two houses. Additionally, a long wooden pier snapped in half with dozens of boats attached to it at the time, causing damage to surrounding boats and to another pier. A rained spotter recorded an 80 mph gust with a handheld anemometer. Penny sized hall was also reported.
