Thunderstorms producing torrential rainfall moved across southern Winnebago County and Rockford during the late evening of July 13th into the early morning of July 14th producing significant flash flooding and numerous water rescues, though no injuries were reported.

Water rescues were reported near Eastmoreland Avenue and Broadway; Near Auburn Street and Huffman Boulevard; Broadway at Woodruff Avenue; Near Charles Street and 22nd Street; Green Dale Drive and Ashbrook Drive; Spring Creek Road and North 2nd Street; Riverside Boulevard and Latham Street; Near Chelsea Avenue and Arden Court; Near State Street and Trainer Road; At Don Carter Lanes on Street State; Auburn Street and Central Avenue; In the 3400 block of Garfield Drive; Sandy Hollow Road and Alpine Road and several water rescues were reported on the 600 block of St. Louis Avenue. Multiple vehicles were stuck in flood waters along Charles Street including an ambulance. A car was submerged in a parking lot near Charles Street.

Numerous streets were flooded and impassible. Kishwaukee Street was flooded and impassable at 23 rd Avenue. A photo showed flowing water over Charles Street at Perryville Road; Video showed several inches of water on State Street just west of Rockford Avenue and a drainage ditch was overflowing near Harrison Avenue and Alpine Road.

Houses were flooded near Javelin Drive and Woodridge Drive. Pavement damage was reported to a nearby parking lot. Water was reported entering a few structures near downtown Rockford including along Benton and State Streets. Numerous homes were surrounded by flood waters along Northwest Drainage Ditch in northwest Rockford where water rescues were done by boat. Flood waters were up to the doorway of houses in the 1000 block of 14th Street where residents were being evacuated. Multiple houses were surrounded by water due to flooding of Keith Creek between 11th Street and 18th Street and a house was flooded near Whitman Street and Rockton Avenue. Several hundred basements were flooded.

Some of the highest storm total rainfall amounts included 6.30 inches three miles west northwest of Rockford; 6.24 inches two miles east northeast of Rockford; 5.69 inches three miles south southeast of Loves Park; 5.66 inches two miles northwest of Cherry Valley; 4.87 inches two miles west northwest of Loves Park and Rockford Airport measured 2.40 inches. Rainfall rates during the heaviest thunderstorms were between 2 to 4 inches per hour. A trained spotter reported 4 inches of rain in one hour in Loves Park between 2130 CST and 2230 CST.

Around 2115 CST, a pickup truck with two people inside attempted to drive through moving flood waters in a parking lot due to flash flooding of Keith Creek near Charles Street and 22nd Street. The pickup truck was swept away by the flood waters. The driver was able to escape but was swept underneath a culvert at 22nd Street before being rescued. A 76 year old passenger became trapped in the pickup truck and drowned.

Direct Fatalities: M76VE

A tornado with estimated peak winds of 95 mph touched down just inside the entrance to the Big Rock Campground near Granart Road. Extensive, primarily EF-0, tree damage occurred along the path of this tornado. The tornado was likely at peak intensity as it moved through Sugar Grove, just south of Route 30. Several homes had minor roof damage near Ridgeview Lane. Several healthy trees were uprooted and snapped. The tornado passed over the Sugar Grove Fire Department building near Municipal Drive which suffered minor structural damage, some of which appeared to be caused by flying tree debris. An approximately 2,000 pound partial roof for firefighter training was lifted and moved a couple of feet. Additional minor structural damage occurred at some residences in nearby subdivisions. The tornado continued moving east northeast, crossing Route 56 twice, before moving into the west side of Aurora. The tornado crossed Route 83 where it produced sporadic shingle and fascia damage along with continued tree damage. Several fences were also blown down. The tornado appeared to end just east of Edgelawn Drive.

A tornado with estimated peak winds of 85 mph touched down west of Esker Road, just north of the Aurora Municipal Airport and moved northeast crossing Route 47 onto the campus of Waubonsee Community College where several trees and trees limbs were snapped and blown down. The tornado then moved through a subdivision just south of Interstate 88 where it produced sporadic minor roof damage to some homes and continued producing tree damage including uprooted and some snapped trees. Utility poles were also damaged. The tornado crossed Interstate 88 then crossed Route 83 where it produced tree damage and minor fascia damage to some homes between Oak Street and Interstate 88. Minor damage was reported to houses and to cars from the fallen tree limbs. Power lines were also blown down in this area. The tornado crossed the Fox River and continued to produce sporadic tree damage until it ended near Interstate 88 and Farnsworth Avenue.

A tornado with estimated peak winds of 100 mph touched down between Beecher Road and Rob Roy Creek on the north side of Yorkville. The tornado moved east through Bristol producing tree damage and then moved through Oswego where extensive tree damage occurred. Numerous large trees were uprooted and snapped in a subdivision near Route 71. Some of the trees fell onto houses and other trees brought down utility poles and power lines. It is at this location, just east of the Fox River, where the tornado was likely at peak intensity. Roof damage to multiple homes occurred near Southbury Boulevard and Lakeshore Drive. The tornado continued moving east northeast producing sporadic tree damage and crossed into Will County just west of the intersection of Route 30 and Eola Road.

A tornado with estimated peak winds of 110 mph which touched down in Kendall County crossed into Will County just south of Mound Road. It quickly crossed Mound Road where it produced damage to numerous trees and outbuildings. The tornado continued to produce tree damage in Shorewood, including snapped trees. It crossed the Fox River and caused a partial roof collapse to a home on Canterbury Street. Two people inside the house were injured. The tornado continued moving northeast, crossing Interstate 55 and snapping trees in a forest preserve south of the Joliet Regional Airport. Several trees were uprooted in a subdivision near McDonough Street and Houbolt Road. Damage to corn crops also occurred in this area. The tornado continued moving northeast across the Inwood Golf Course. Over 100 trees were damaged, some snapped, others uprooted. Some of the trees that were damage dwere 70 years old. The tornado crossed the intersection of Route 52 and Larkin Avenue. Significant tree damage, power line damage and utility pole damage occurred in this area. Numerous roofs were also damaged including a church on Midland Avenue just north of Route 52. The tornado was likely at peak intensity as it moved through the golf course to areas east of Larkin Avenue . The tornado continued producing tree damage as it moved northeast and crossed the Des Plaines River. After crossing the river, the tornado began to weaken producing sporadic tree damage until it ended near the intersection of Route 6 and Briggs Street.

		TATES [41.50, -87.79] 0	Tornado (EF2, L: 24.90 mi , W: 325 yd)

A tornado with estimated peak winds of 130 mph which touched down in Grundy County and crossed into Will County between Lauren Drive and Old Kerry Grove Road. The tornado was likely at its maximum path width of 325 yards as it was crossing into Will County. Several trees and utility poles were blown down in this area. Some homes suffered minor roof damage just west of McKinley Woods Road. Peak wind speeds of 90 mph were estimated in this area. The tornado crossed Durkee Road and increased to its peak intensity of 130 mph as it moved across Interstate 55. In this area, two metal trusses collapsed which caused several high tension power lines to fall across Interstate 55. When these high tension lines fell, two semi trucks hit the lines and crashed into each other. Five other vehicles were involved and stuck under and between the high tension lines. Two people were injured and another person had to wait several hours before it was safe to exit their car. Interstate 55 was closed until the morning of July 18th while the high tension lines were repaired and debris was removed. Just west of Interstate 55, several parked semi trucks and trailers were overturned and an office building suffered significant roof damage. A pickup truck was flipped over and a van was blown onto its side. Significant damage to trees, utility poles and power lines also occurred in this area. The tornado continued moving northeast and produced significant tree and utility pole damage along and south of Manhattan Road, just west of Route 53, including damage to mature oak trees and several utility poles snapped along Munch Lane. Several homes in this area suffered roof damage consisting of numerous shingles removed. The tornado moved through the Ranch Oaks subdivision just west of Route 52 and south of Jackson Creek causing widespread tree and power line damage. Some trees fell onto houses, other trees fell onto cars. Significant tree damage continued as the tornado crossed Route 52. At least one house suffered structural damage when a large tree fell on it. Roof damage occurred to several large farm storage buildings as the tornado crossed Baker Road just west of Eastern Avenue. Tree damage continued along the rest of the path of the tornado in Will County with the tornado crossing Route 45 and then several trees were snapped and uprooted near the Prestwick Country Club. The tornado crossed Harlem Avenue and moved into Cook County.

A tornado with estimated peak winds of 90 mph touched down near the Chicago Sanitary and Ship Canal immediately north of Interstate 294. It moved across a mobile home park where it caused damage to trees and homes north of Park Avenue . The tornado crossed Garden Lane where several large, healthy trees were either uprooted or snapped. Minor shingle, siding and fascia damage to homes also occurred. A greenhouse was blown about 75 feet to the north. The tornado was likely at peak intensity in this area. The tornado continued through a cemetery and broadened considerably as it ended east of Roberts Road near 74th Place.

A tornado with estimated peak winds of 90 mph touched down in a field just east of County Road N 14500 E and north of County Road E 9000 N. Just after touch down, the tornado peeled off a significant portion of roofing material off a building at a food facility near County Road N 16000 E. A semi trailer was rolled over in an adjacent parking lot. The tornado was likely at peak intensity in this area. The tornado moved northeast across mainly open fields resulting in little damage until after it crossed County Road N 16750 E where numerous trees were damaged and a few homes sustained shingle and fascia damage. The tornado ended just northeast of this area, in a field just west of County Road N 17500 E.

A tornado with estimated peak winds of 90 mph touched down near Eagle Lake in Will County in northeast Illinois and crossed into Lake County just south of 133rd Avenue. Numerous large tree limbs were blown down near 135th Street west of Calumet Avenue. White Oak Avenue was blocked with tree limbs and power lines, just north of 135th Avenue. The tornado crossed Route 41 and produced extensive tree damage along 129 th Avenue with some trees snapped. A metal road sign post was rotated 180 degrees. Several homes suffered minor roof and fascia damage. A metal commercial building lost most of its roof. A chimney was blown off of a roof and a free standing garage was partially collapsed . Tree damage continued along and north of 129th Avenue as the tornado turned northeast and crossed Parrish Avenue where trees were uprooted . Tree damage continued as the tornado moved east near Havenwood Pass and then along 124th Avenue after crossing Cline Avenue. The tornado continued moving northeast, crossing Burr Street where a window was blown out of a garage on 122nd Avenue. Numerous shingles were removed from a house on 121st Avenue, just east of Burr Street. Numerous trees and power lines were blown down as the tornado moved through Crown Point, south of Route 231. Utility poles were also damaged. On 120th Avenue, a house suffered significant siding damage and a metal shed was blown several yards . Some homes suffered minor roof and fascia damage near Hyde Park. The tornado crossed Route 231 near 113th Avenue and damaged an industrial building just west of Route 53. Metal roof panels were peeled away, two metal garage doors were blown out, a small section of a wall was blown in and some insulation was found in nearby power lines at least 100 yards away. The tornado crossed Interstate 65 and continued producing tree damage until it crossed into Porter County halfway between 101st Avenue and 93rd Avenue.

Numerous large tree limbs were blown down just west of Cedar Lake including a few that fell onto houses. One large tree limb, approximately 20 inches in diameter and 70 feet tall fell onto a one story house on 141st Court. The tree caused significant structural damage to the house and pinned a 44 year old woman in a bed. She died a short time later. Two other people in the house at the time were not injured.

Direct Fatalities: F44PH
