More heavy rain occurred due to plenty of moisture and lift around the Blue Ridge Mountains of central Virginia. The ground was already saturated due to previous rainfall, so this led to more instances of flooding and flash flooding.

The River Gauge on the Shenandoah River near Millville, WV reached minor flood stage (10ft) with a peak crest of 11.16 feet. At 10 feet, parts of Bloomery Road and John Rissler Road are flooded near Bloomery, West Virginia. Once these roads flood, access to homes is impaired but the homes themselves are not in any danger of flooding. Moulton Park and the Millville boat launch are also flooded. At 11 feet, a small portion of Wilt Road (County Road 9/8) begins to flood. Water also begins to flow over Millville Dam.

The remnants of Tropical Storm Helene brought widespread heavy rain to the region that led to river flooding and flash flooding in the state of West Virginia.
