Towanda	16.00	9/26/1977	16.42	98,900	Minor	Main Stem Susquehanna	Susquehanna River	Bradford	Bradford

Weather Summary

Showers developed in late September along a front associated with a low pressure system located over southern Canada. As was the case during a storm just a few days ago, the northern part of the Mid-Atlantic received the most rainfall. As much as 1.00 to 2.00 inches of rain fell in New York and northern Pennsylvania, which caused flooding on the Susquehanna and Cowanesque Rivers.
