

# Flood Event of 3/15/1984 - 3/15/1984

## James

Site	Flood Stage	Date	Crest	Flow	Category	Basin	Stream	County of Gage	County of Forecast Point
Bremo Bluff	19.00	3/15/1984	24.90	67,000	Moderate	James	James River	Fluvanna	Fluvanna

## Weather Summary

A low pressure system formed off of the Mid-Atlantic coastline as an area of positive vorticity associated with a weak shortwave moved over the Great Lakes. The system brought rain to much of the eastern United States on the 13th of March. Areas in Virginia and New Jersey saw upwards of 1.50 inches of rain which caused flooding two days later on the Rancocas Creek and the James River.
