Passaic

Site	Flood Stage	Date	Crest	Flow	Category	Basin	Stream	County of Gage	County of Forecast Point
Macopin Intake Dam	15.00	4/27/1986	15.08	1,450	Minor	Passaic	Pequannock River	Passaic	Passaic

Weather Summary

A low pressure system formed off of the California coast and began to make its way across the United States on April 12. It moved into the Midwest on April 14 and began to rapidly deepen. Precipitation ahead of the system began to enter the Mid-Atlantic region on April 15. The highest rainfall totals occurred in Central Pennsylvania on April 15 and New Jersey on April 15-16. Parts of New Jersey received 3-4" of rain before the system finally exited the region on April 17.
