| Site | Flood Stage | Date | Crest | Flow | Category | Basin | Stream | County of Gage | County of Forecast Point |
|------------|-------------|-----------|-------|--------|----------|--------------------------|--------------------------------|----------------|--------------------------|
| Bainbridge | 13.00 | 2/10/1988 | 17.85 | -9,999 | Minor | North Branch Susquehanna | North Branch Susquehanna River | Chenango | Chenango |

Weather Summary

A strong low pressure system ushered in above freezing temperatures and very moist air to the New York region. This system produced 0.54 inches of precipitation, causing Bainbridge, New York to have a level above flood stage. Provided by Kathy Villanueva – The Pennsylvania State University / Melt most likely contributed to the flood. (MARFC)
