| Tunkhannock | 11.00 | 10/21/1995 | 11.18 | 13,200 | Minor | Main Stem Susquehanna | Tunkhannock Creek | Wyoming | Wyoming |

Weather Summary

Severe thunderstorms associated with a rapidly deepening low pressure system over the Great Lakes threatened the Northeastern United States with heavy rains, high winds, and tornadoes. Many small streams overflowed their banks and caused flooding on roadways. Storm totals across the Northeast averaged between 3 and 7 inches of rain.
