Blackwells Mills	9.00	4/10/1998	9.53	4,870	Minor	Raritan	Millstone River	Somerset	Somerset

Weather Summary

A strong occluded system moved eastward across the Mid-Atlantic states which provided rain showers for much of the region from the 8th into the 10th. The rain began across parts of southern New Jersey and Pennsylvania on the 8th as the warm front associated with the system moved northward into the region. The system as a whole then became occluded as it continued to move into the region. Upwards of 2.00 inches fell in Southern New Jersey and, as a result, the Millstone River reached minor flood stage in Blackwell Mills, NJ on the 10th.
