Sherburne	8.00	5/14/2000	8.88	4,400	Minor	North Branch Susquehanna	Chenango River	Chenango	Chenango

## Weather Summary

From May 12-14 a cyclone crossed the Great Lakes and swept its associated warm front up through the Middle Atlantic Region. Thunderstorms developed ahead of the front that although not severe, did produce copious amounts rainfall resulting in flash floods across eastern New York. Rainfall amounts were up to an inch per hour. After the warm front lifted north, the associated cold front swept through and produced more severe thunderstorms that further drenched a waterlogged region. Accumulations after the storm system passed exceeded 2 inches in places like Binghamton, NY.
