

Flood Event of 1/14/2014 - 1/14/2014

Lower Main Stem Susquehanna

Site	Flood Stage	Date	Crest	Flow	Category	Basin	Stream	County of Gage	County of Forecast Point
Middletown	11.00	1/14/2014	11.42	-9,999	Minor	Main Stem Susquehanna	Swatara Creek	Dauphin	Dauphin

Weather Summary

Numerous showers and scattered thunderstorms were common across the Middle-Atlantic Region on January 11 as a dynamic cold front moved across the basins. Rainfall of a half to one inch was common with locally heavier amounts. Rises in the upper Susquehanna Basin moved downstream reaching the lower Susquehanna basin on January 13-14. This water combined with temperatures in the 40s was enough to dislodge the ice along the lower main stem Susquehanna River with jamming and brief backwater flooding at Middletown, PA.
