Dawsonville	7.50	12/25/2015	7.75	2,500	Minor	Potomac	Seneca Creek	Montgomery	Montgomery

Weather Summary

A weak cold front dropped southeast and became stationary across the Mid-Atlantic Region. A steady feed of moisture on the back side of a high pressure system in the western Atlantic produced unseasonably warm and unsettled conditions across the MARFC southern basins. Dew points ran as high as 70 degrees in the Appomattox basin. Several disturbances ran along the front producing periods of showers and some thunderstorms. A few of the thunderstorms produced locally heavy downpours in short period of time.

Crest Statistics and Flood Information

First flood of 1 that occurred in Dec, 2015

Tenth flood of 10 that occurred in 2015
