Weather Summary

After a record December snowfall about a week earlier left a significant snowpack in much of Pennsylvania and New York, a sharp cold front moved into and through the Mid-Atlantic. In advance of the cold front, very warm air with dewpoints in the 40s and 50s were accompanied by heavy rainfall of 1 to over 4 inches in much of the Mid-Atlantic. Minor flooding occurred in areas with little or no snow but more significant and widespread flooding occurred in areas that experienced rapid snowmelt along with the rainfall.
