

County Impacts Associated with Hurricane Debby (2024)

Narratives listed in alphabetical order by county.

Updates:

- 08/07/2024 - Initial issuance.
- 08/13/2024 - Added damage assessment for Collier County

County Name Broward	Injuries: 0	Fatalities: 0	Evacuations: 0
Minor wind damage, mainly to trees, was reported in the city of Fort Lauderdale. No other impacts of note.			

County Name Collier	Injuries: 0	Fatalities: 0	Evacuations: 0
<p>Widespread minor to moderate flooding occurred across western and coastal sections of the county, with water entering structures in several neighborhoods in the Naples, North Naples, and Golden Gate/Golden Gate Estates areas. Water depth was approximately 1-2 feet on many streets in this area. This flooding was likely a result of the 4-6 inches of rain which fell during high tide on August 4th. A NWS survey indicated that the storm surge did not overtop the dunes at the Naples area beaches.</p> <p>In Marco Island and Goodland, NWS survey and damage assessments by local officials indicated that flood inundation was mainly 1-2 feet from a mix of rainfall and storm surge, and entered several coastal structures up to 6 inches deep as well as an estimated 50-70 stalled vehicles.</p> <p>In Everglades City and Chokoloskee, generally 1-1.5 feet of inundation was indicated by the storm survey, mainly from the storm surge. Maximum high water mark of 27" outside the Smallwood Store in Chokoloskee on the shoreline of Chokoloskee Bay.</p> <p>Total damage in unincorporated Collier County (excluding the cities of Marco Island, Everglades City, and Naples) is \$877,947, with 6 properties suffering major damage and 31 with minor damage.</p>			

County Name Glades	Injuries: 0	Fatalities: 0	Evacuations: 0
Little to no impacts of note.			

County Name Hendry	Injuries: 0	Fatalities: 0	Evacuations: 0
Little to no impacts of note.
