

County Impacts Associated with Potential Tropical Cyclone 8 (2024)

Narratives listed in alphabetical order by counties.

Updates:

-

County Beaufort	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
<p>Impacts across Beaufort County were minimal with rainfall data showing 2-4 inches of rain falling across the area. Minor coastal flooding reported for areas along the Pamlico and Pungo Rivers, with inundation 1 ft agl or less.</p>			

County Carteret	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
<p>EF-0 TORNADO in Cape Carteret: A brief tornado was confirmed just southeast of Cape Carteret Monday evening, Sep 16, 2024 , with peak wind around 60 mph. A sporadic path of very minor damage started near the intersection of Hunting Bay Drive and Bayview Court. Mainly minor tree damage was found, consisting of small to medium branches in a clear path near two homes. At one home shingles on a well pump house were lifted up. In addition, some light metal flashing, likely drip edging, was blown from one side of the house to the backyard. Several trees were also snapped about 40 ft up from the base. Here wind speeds were estimated to be around 60 mph. A very sporadic and minor damage path continued northwest across Easy Street and Bayshore Drive before ending. Along this path only a few smaller limbs down with wind speeds of no more than 55 mph estimated.</p> <p>Widespread flash flooding reported with rainfall amounts 4-8 inches. Numerous roads flooded or closed throughout the county, including in the towns of: Cape Carteret, Emerald Isle, Newport, Morehead City, Beaufort, Otway, Davis and North River.</p> <p>Minor wind damage was reported via Carteret-Craven EMC, which led to trees and powerlines down in Cape Carteret.</p> <p>Minor coastal flooding reported throughout the county with inundation 1-2 ft agl.</p>			

County Craven	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
<p>Impacts across Craven County were minimal with rainfall data showing 2-6 inches of rain.</p> <p>Minor coastal flooding reported for areas along the Neuse and Bay Rivers, with inundation 1-2 ft agl.</p>			

County Dare	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-----------------------	----------------	---------------------------------------	-------------------

Rainfall amounts ranged from 1 to 2 inches across Hatteras Island, to 5 to 10 inches across the Northern Outer Banks. Higher rainfall totals lead to flash flooding, with multiple reports of flooded roads from Duck to Kitty Hawk.

Minor to locally moderate coastal flooding was reported, with the main impacts seen across oceanside Hatteras Island due to ocean overwash. Ocean overwash was reported through several high tide cycles, from Pea Island down to Buxton, impacting NC-12.

County Duplin	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-------------------------	----------------	---------------------------------------	-------------------

Rainfall reports showed 3-5 inches of rain, which resulted in flash flooding across portions of the county. Reports of multiple roads closed around Lyman, NC.

County Greene	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-------------------------	----------------	---------------------------------------	-------------------

Impacts across Greene County were minimal with rainfall data showing 2-3 inches of rain falling across the area.

County Hyde	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-----------------------	----------------	---------------------------------------	-------------------

Impacts across Hyde County were minimal with rainfall data showing 2-8 inches of rain falling across the area.

Minor to locally moderate coastal flooding was reported, with the main impacts seen across oceanside Ocracoke Island due to ocean overwash. Ocean overwash was reported through several high tide cycles, which closed the northern portions of NC-12 for about 2 days, also impacting ferry services to the island.

County Jones	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
------------------------	----------------	---------------------------------------	-------------------

Impacts across Jones County were minimal with rainfall data showing 3-6 inches of rain falling across the area.

County Lenoir	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-------------------------	----------------	---------------------------------------	-------------------

Impacts across Lenoir County were minimal with rainfall data showing 2-5 inches of rain falling across the area.

County Martin	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-------------------------	----------------	---------------------------------------	-------------------

Impacts across Martin County were minimal with rainfall data showing 1-2 inches of rain falling across the area.

County Onslow	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-------------------------	----------------	---------------------------------------	-------------------

Localized flash flooding reported in the county, with rainfall data showing 4-8 inches falling across the area.

County Pamlico	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
--------------------------	----------------	---------------------------------------	-------------------

Impacts across Pamlico County were minimal with rainfall data showing 2-4 inches of rain falling across the area. Minor coastal flooding reported for areas along the Neuse and Bay Rivers, with inundation 1-2 ft agl.

County Pitt	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
-----------------------	----------------	---------------------------------------	-------------------

Impacts across Pitt County were minimal with rainfall data showing 1-3 inches of rain falling across the area.

County Tyrrell	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
Impacts across Tyrrell County were minimal with rainfall data showing 2-4 inches of rain falling across the area.			

County Washington	Injuries: 0	Fatalities: 0 direct 0 indirect	Evacuations: 0
Impacts across Washington County were minimal with rainfall data showing 1-2 inches of rain falling across the area.
