From: Fiona Horsfall
 Chief, Climate Services Branch

Subject: Updated: Immediate Cessation of ASOS Weather Observations and
Climate Products for Campo, California (KCZZ)

Updated to correct the World Meteorological Organization (WMO) headings
from CDUS45 to CDUS46 and CXUS55 to CXUS56.

Effective immediately, weather observations from the Automated Surface
Observation System (ASOS) at Campo, CA, (KCZZ) will cease due to
unexpected construction at the site. The ASOS equipment will be moved to
a new location with a new site and identification being established. A
new Service Change Notice will be sent when the new site is online.
Daily and monthly climate reports for the site will also be terminated.

The following products are impacted:

Product Name	WMO Heading	AWIPS ID
-----	-----	-----
Daily Climate Report	CDUS46 KSGX	CLICZZ
Monthly Climate Report	CXUS56 KSGX	CLMCZZ
Preliminary Climatological Data	CXUS56 KSGX	CF6CZZ

The Cooperative Observer Program (COOP) site at Campo, CA, (site ID
CPMC1) represents the official climate record and was collocated with the
ASOS but it will remain at this site. The data at this site, and the
valuable official climate record for Campo dating back to 1931, will
continue to be maintained. This data can be found in the Regional
Temperature and Precipitation (ASUS66 KSGX RTPSGX) product. This product
is issued three times daily from Weather Forecast Office (WFO) San Diego.

For questions regarding this suspension, please contact:
