From: James E. Hoke
 Director, Hydrometeorological Prediction Center

Subject: Soliciting Comments until March 31, 2011 on the Experimental QPF
Forecasts For Days 4 And 5

The Hydrometeorological Prediction Center (HPC) in the NWS National Centers for Environmental Prediction is accepting comments until March 31, 2011, on experimental 6-hourly quantitative precipitation forecasts (QPF) for days four and five. The HPC derives this product using QPF values from the Global Ensemble Forecast System (GEFS) to disaggregate the 48-hour forecasts issued for days four and five by HPC forecasters into 6-hour increments.

The experimental 6-hour interval QPF product for days four and five has been entered into the national catalog of new and enhanced products. You may view it at the following link:

<http://products.weather.gov/detaile.php?selrow=412>

The products can be seen at the following link:

http://www.hpc.ncep.noaa.gov/qpf/day45_6hrly.php

Please submit comments to the following link:
