From: Edward Clark
 Acting Chief, Hydrologic Services Branch
 National Weather Service Headquarters

Subject: Amended: Soliciting Comments on the Experimental River Forecast
Center Decision Support Map through April 1, 2015

Amended to extend comment period through April 1, 2015, and to add two
additional participating River Forecast Centers (RFCs).

NWS is seeking comments on the Experimental River Forecast Center Decision
Support Map through April 1, 2015. The NWS West Gulf River Forecast
Center, Arkansas Red Basin River Forecast Center, Lower Mississippi River
Forecast Center, and the Southeast River Forecast Center are testing a new
Hydrologic Decision Support Map service that melds a variety of spatial
data products on the same background map to aide analysis and decision
making.

The Hydrologic Decision Support Map is a Google Map-based tool containing
many of the data sets needed to make water resources, flood, and emergency
management decisions. The map tool provides stakeholders the flexibility
to create customized maps and the ability to scale maps beyond a single
RFC boundary.

The Decision Support Map and a description of how to use the map are
available at:

<http://www.srh.noaa.gov/wgrfc/> <http://www.srh.noaa.gov/serfc/>
<http://www.srh.noaa.gov/abrfc/> <http://www.srh.noaa.gov/lmrfc/>

Users are encouraged to provide feedback on this experimental product by
using the brief survey and comment form at:

<http://www.nws.noaa.gov/survey/nws-survey.php?code=RFCDSM>

or provide comments directly to sr-fwr.dsstool@noaa.gov.

At the end of the comment period, the product will be evaluated for
operational status as a national product.
