From: Eli Jacks
 Chief, Forecast Services Division

Subject: Corrected: National TCV Product Collaboration Tests, June 6-9,
2016

This public information statement was corrected to add an additional
contact.

The NWS's National Hurricane Center (NHC), along with 32 NWS Weather
Forecast Offices (WFOs) in Southern Region, and 11 NWS WFOs in Eastern
Region, will commence with internal software and hardware testing of the
new National Tropical Cyclone Valid Time Event Code (TCV) product
collaboration process on Monday, June 6, and continue daily through
Thursday, June 9, 2016.

Internal testing will begin at approximately 1400 Greenwich Mean Time
(GMT) and terminate at 1800 GMT daily during scheduled test days. In the
event of inclement weather, a backup date for a portion of the test has
been reserved for June 10, 2016.

Internal TCV test products are not intended to be released externally
through NWS dissemination and communication systems.

NHC and WFO internal software and hardware testing will continue
periodically during the remainder of 2016 in developmental support of the
new national TCV product, projected for operational implementation in
2017. The new national TCV product will contain a summary of NHC/WFO
collaborated Wind and/or Storm Surge Watches and Warnings, depicted by
geographic zones and communication points.

NWS WFOs participating in the national TCV product collaboration tests are
listed below by NWS Region:

NWS - Southern Region

Albuquerque, NM (ABQ)
Amarillo, TX (AMA)
Atlanta, GA (FFC)
Austin-San Antonio, TX (EWX)
Birmingham, AL (BMX)

Brownsville, TX (BRO)
Corpus Christi, TX (CRP)
El Paso, TX (EPZ)
Fort Worth, TX (FWD)
Houston/Galveston, TX (HGX)
Huntsville, AL (HUN)
Jackson, MS (JAN)
Jacksonville, FL (JAX)
Key West, FL (KEY)
