Subject: Seeking Public Comment and Review on a Prototype Regional  
Rainfall Webpage from NWS Corpus Christi, TX through October 4, 2017

Through October 4, 2017, NWS Corpus Christi, TX, will provide a prototype web page displaying observed regional rainfall maps for central and south Texas covering the county warning areas for Brownsville, Corpus Christi, Austin/San Antonio and Houston/Galveston, TX. Four graphics containing observed rainfall durations of 24-hour, 48-hour, 72-hour, and weekly will be produced.

The national Advanced Hydrologic Prediction Service (AHPS) daily rainfall shapefiles available from:

<https://water.weather.gov/precip/download.php>

will be used in the generation of these observed rainfall maps.

All of these maps will be normally produced by noon Central Time each day and will be available at:

[http://www.weather.gov/crp/texas\\_regional\\_rainfall](http://www.weather.gov/crp/texas_regional_rainfall)

The webpage also will include a built-in archive capability so the user can quickly access past observed rainfall maps. This prototype webpage, which is a limited regional implementation, will be used to assess and evaluate feedback to support a future national implementation within AHPS. An experimental public comment/review period will take place if NWS decides to pursue implementation within AHPS.

Comments can be accepted through October 4, 2017 via an interactive link on the product webpage:

[www.nws.noaa.gov/survey/nws-survey.php?code=RegRain](http://www.nws.noaa.gov/survey/nws-survey.php?code=RegRain).
