              -NOAAPort  
              Other NWS Partners, Users and Employees

From:         Eli Jacks  
              Chief, Fire and Public Weather Services Branch

Subject: Modified Zone Forecast Product (ZFP) for Weather Forecast Office  
Juneau (AJK), Alaska: Effective November 2, 2010

Effective Tuesday, November 2, 2010, at 1300 Coordinated Universal Time (UTC), 5:00 AM Alaska Daylight Time (AKDT), Weather Forecast Office (WFO) Juneau (AJK), Alaska, will modify its Zone Forecast Product (ZFP) by adding optional "specific site forecast" information to the bottom of the product. See NWS Instruction (NWSI) 10-204, Derived Forecast Text Products Specifications, ZFP Format:

[http://www.weather.gov/os/public/dir/ZFP\\_Format.pdf](http://www.weather.gov/os/public/dir/ZFP_Format.pdf)

In the new format, specific communities will be listed within each forecast zone along with maximum and minimum temperatures and probabilities of precipitation for up to two days into the future.

This change will improve service by providing greater detail to the zone forecast.

Table 1. Product Affected by this Change

Product Name	WMO Header	AWIPS ID
-----	-----	-----
Zone Forecast Product	FPAK57 PAJK	ZFPAJK

Once this change is made, the AJK ZFP will have the same format as the ZFPs currently issued by WFOs Anchorage and Fairbanks, AK.

Partners and users must reprogram affected hardware and software to continue correctly processing the AJK ZFP.
