Subject: Changes to the Fire Weather Zones in Washington State: Effective
June 6, 2013

Effective Thursday, June 6, 2013, at 500 AM Pacific Daylight Time (PDT),
1200 Coordinated Universal Time (UTC), the NWS Weather Forecast Office in
Spokane, WA (WFO OTX), will change some eastern Washington fire weather
zone boundaries, names and numbers. This change supports a more efficient
forecast process and provides NWS partners and users improved fire weather
watch, warning and forecast products.

Historically, fire weather forecast services for the Northern Columbia
Basin (WAZ673) and the Northeast Mountains (WAZ686) have used two large
fire weather zones, resulting in planning forecasts that are broad and
generic. NWS is dividing these two large zones into three smaller zones
more closely aligned with fire agency dispatch boundaries and climatic
regimes. Two of the new zones (WAZ673, Northern Columbia Basin and
WAZ686, Northeast Mountains) will retain their current zone numbers and
names while changing their zone boundaries. The zone boundary changes
have been determined by WFO OTX not to significantly affect the fire
weather climatology of the existing zones.

Once NWS implements the change, the following Universal Geographic Code
(UGC), zone names, numbers and geographic descriptions will be used in
eastern Washington State.

Table 1: WFO OTX Fire Weather Zones Affected by this Change

Zone UGC	Zone Name
-----	-----
WAZ673	Northern Columbia Basin

This includes all of the land east of the Columbia River at the Grant and
Douglas County line to the Ferry County line, then southeast through
eastern Lincoln County to Whitman and Adams County, then south along the
Whitman County line to the southern Adams County line.

WAZ686 Northeast Mountains

This includes all of the land from north of the Spokane River to the Canadian border and east of the Kettle/Columbia River to the Idaho state border.

WAZ674 Eastern Washington East Columbia Basin

This new zone includes all of the land area south of the Spokane and Little Spokane Rivers south to the Snake River, east of eastern Lincoln County and the Whitman County line to the Idaho border.

Table 2: WFO OTX Fire Weather Products Affected by this Change

Product Name	WMO Header	AWIPS ID
-----	-----	-----
Fire Weather Planning Forecast	FNUS55 KOTX	FWFOTX
Fire Weather Watch/Red Flag Warning	WWUS85 KOTX	RFWOTX
National Fire Danger Rating System	FNUS85 KOTX	FWMOTX

An updated fire weather zone map shapefile containing the new zones is online at:
