Service Change Notice 13-58
National Weather Service Headquarters Washington DC
725 AM EDT Tue Sep 3 2013

To: Subscribers:
 -Family of Services
 -NOAA Weather Wire Service
 -Emergency Managers Weather Information Network
 -NOAAPort
 Other NWS Partners, Users and Employees

From: Mary Mullusky
 Chief, Hydrologic Services Branch

Subject: Discontinuation of Passaic Flood Warning System Data on the
Automated Flood Warning Systems (AFWS) Web Pages: Effective on or before
September 30, 2013

On or before September 30, 2013, the point precipitation observations from
the Passaic River Flood Warning System (PFWS) will no longer be displayed
at:

<http://water.weather.gov/afws/>

The Automated Flood Warning System (AFWS) data on this Website comes from
external data partners. The PFWS is owned by the U.S. Army Corps of
Engineers (USACE). The USACE is reconfiguring this network from Automated
Local Evaluation in Real Time (ALERT) protocols to GOES protocols. Due to
the change in the configuration of the network, the data will not be
available for display at the link above. The NWS will receive the
reconfigured data through GOES protocols and will use this data in its
watch and warning operations. On or before September 30, 2013, the data
should be available at:

<http://waterdata.usgs.gov/nj/nwis/current/?type=weather;group key=basin cd>

For further information, please contact:
