Service Change Notice 16-03
National Weather Service Headquarters Washington DC
120 PM EST Thu Jan 28 2016

To: National Weather Service (NWS) Offices
Federal Aviation Administration (FAA) Customers
Family of Services (FOS) Subscribers
Other Customers of NWS Aviation Forecasts

From: William Bauman
Chief, Aviation and Space Weather Services Branch

Subject: Change of Identifier for New York Oceanic Flight Information
Region (FIR): Effective April 14, 2016

Note: The following changes have no impact on NOAA Weather Wire Service subscribers.

Effective April 14, 2016, at 1500 Coordinated Universal Time (UTC), 1100 a.m. Eastern Daylight Time, the NWS will begin using the recently implemented 3-letter identifier ZWY for the New York Oceanic Flight Information Region (FIR) in all NWS products. This will replace the previously used ZNY identifier for the New York Oceanic FIR. The New York FIR over land will continue to be referenced via the ZNY identifier.

FIRs are geographical areas referenced by air traffic controllers and in weather forecasts and warnings. The descriptions and Geographic Information System (GIS) files for the FIRs are maintained by the International Civil Aviation Organization.

If you have questions regarding this product, contact:

Matt Strahan
Chief, International Operations Branch
Aviation Weather Center
