From: Allison Allen
 Chief, Marine, Tropical and Tsunami Services Branch

Subject: Discontinuation of the Experimental Hurricane Threats and Impacts Graphics Web Interface: Effective April 10, 2017

Effective April 10, 2017, the NWS will discontinue the experimental Hurricane Threats and Impacts Graphics Web Interface, also known as HTI-Web. This service was previously found on the following site:

<http://preview.weather.gov/hti>

The experimental interface provided access to the Hurricane Threats and Impacts Graphics. The Hurricane Threats and Impacts Graphics can still be found on the following site in downloadable Keyhole Markup Language (KML) format:

<http://weather.gov/hti>

The Hurricane Threats and Impacts are also available on the National Digital Forecast Database (NDFD) Graphical Forecast site:

<http://digital.weather.gov>

Feedback provided by users suggested that large-scale changes to the interface are necessary to improve usability. More development work is required to make the page reliably functional. It is anticipated that a new web interface will be available for comment and review once development of this work is completed.
