Service Change Notice 17-37 Updated
National Weather Service Headquarters Silver Spring MD
210 PM EDT Fri Mar 31 2017

To: Subscribers:
 -NOAA Weather Wire Service
 -Emergency Managers Weather Information Network
 -NOAAPort
 Other NWS Partners, Users and Employees

From: Robert Bunge
 Branch Chief, Weather Information Distribution Services
 Office of Dissemination

Subject: Updated: Minor Modification of IDP-GIS WPC_QPF Map Service to
Remove Time-enable Layers: Effective April 13, 2017

Updated effective date to April 13, 2017.

Effective Tuesday, April 13, 2017, the Integrated Dissemination Program-
Geographic Information System (IDP-GIS) will be correcting non-functional
Geographic Information System (GIS) service named wpc_qpf. The updated
GIS service will not be time enabled but will be time aware service.

<https://idpgis.ncep.noaa.gov>

Link to the Representational State Transfer (REST) Map Service endpoint at
the following URL:

https://idpgis.ncep.noaa.gov/arcgis/rest/services/NWS_Forecasts_Guidance_Warnings/wpc_qpf/MapServer

Users of the existing map service should update their applications to use
the revised service once it becomes available. The specific changes users
need to make depend on the type of protocol or endpoints used.

IDP-GIS ArcGIS Server Stack is hosted on the NOAA IDP infrastructure where
it is monitored 24x7 by NWS National Centers for Environmental Prediction
Central Operations.

For questions concerning IDP-GIS web services, please contact:

Nipa Parikh
