From: Chris Brenchley
 Meteorologist-in-Charge, NWS Honolulu, HI

Subject: Discontinuation of the Precipitation Forecast (AGF) for Hawaii:
Effective June 25, 2018

Effective Friday, June 25, 2018, NWS will discontinue the Precipitation Forecast (FNHW40 PHFO, AGFHFO) issued by the Weather Forecast Office in Honolulu, HI. This legacy product is being discontinued because similar information is available in multiple other useful formats, rendering the legacy product obsolete and duplicative.

This precipitation forecast information and additional forecast information is available through accessing the Point Forecast Matrix (PFMHFO), as well as through the "point and click" forecast map on www.weather.gov/hawaii in graphical and text representations by zone designation or by latitude/longitude. Users can obtain information for high impact events through the Area Forecast Discussion (AFDHFO).

If you have questions, please contact:

Chris Brenchley
Meteorologist-in-Charge
Honolulu, HI
