 Other NWS Partners, Users and Employees

From: Allison Allen
 Chief, Marine, Tropical and Tsunami Services Branch

Subject: Updated: Change to Water Level Datum Displayed on the Advanced Hydrologic Prediction Service (AHPS) Webpage Postponed Until Further Notice

Updated to postpone the effective date until further notice via an updated Service Change Notice (SCN).

The coastal water level and flood stages displayed on the Advanced Hydrologic Prediction Service (AHPS) webpage:

<https://water.weather.gov/ahps/region.php?state=ak>

for Alaska will remain in the current reference datum of Mean Lower Low Water (MLLW) and will no longer change to the reference datum of Mean Higher High Water (MHHW) on November 1, 2018.

This change may be re-evaluated in the future by the NWS, at which time a new SCN will be posted detailing the proposed changes.

If you have questions or comments, please contact:
