Technical Implementation Notice 10-63 Corrected
National Weather Service Headquarters Washington DC
1112 AM EST Wed Jan 5 2010

To: National Weather Service (NWS) Offices
Federal Aviation Administration (FAA) Customers
Family of Services (FOS) Subscribers
Other Customers of NWS Aviation Forecasts

From: Cyndie Abelman
Chief, Aviation Services Branch

Subject: Corrected: Change of Terminal Aerodrome Forecast (TAF) Service
for the Replacement St. George, UT, Airport (KDXZ): Effective January 12,
2011

Note: The following changes have no impact on NOAA Weather Wire Service
subscribers.

Corrected station identifier in subject line to KDXZ.

Effective January 12, 2011, at 1800 Coordinated Universal Time (UTC), the
NWS Office in Salt Lake City, UT, will begin disseminating the St. George,
UT, Airport TAF under a new identifier: KDXZ. Routine and updated TAFs
will be issued for the replacement airport, 24 hours a day.

The effective date of this change is sooner than NWS policy (NWS
instruction 10-1805). The reduction of normal lead time for this change
occurred after coordination with local customers and the Federal Aviation
Administration (FAA).

NWS personnel will need to add the following identifier to their
communications systems to receive the new TAF:

Airport	WMO Heading	AWIPS ID
-----	-----	-----
St. George	FTUS45 KSLC	TAFDXZ

In addition, the new TAF will be added to the existing TAF collectives
below, which are transmitted to Federal Aviation Administration (FAA)
personnel and other external users:

WMO Headings	Available to the Following Customers:
-----	-----
FTUS80 KWBC	Non-FAA Domestic and Family of Services
FTUS90 KWBC	FAA Weather Message Switching Center and FAA Facilities
FTUS52 KWBC	Global Telecommunication System Customers

Holders of NWS procedural instruction 10-813 (Terminal Aerodrome
Forecasts) should make appropriate additions to the appendices.

If you have questions regarding this TAF change, contact:

Larry Dunn
Meteorologist-in-Charge
