

# Light Icing Possible Friday Morning

January 30, 2025  
4:33 AM

## Key Messages

- A glaze of ice is expected Friday morning across much of the interior.
- The ice changes to rain during the day.
- There is a chance of refreezing Friday night.

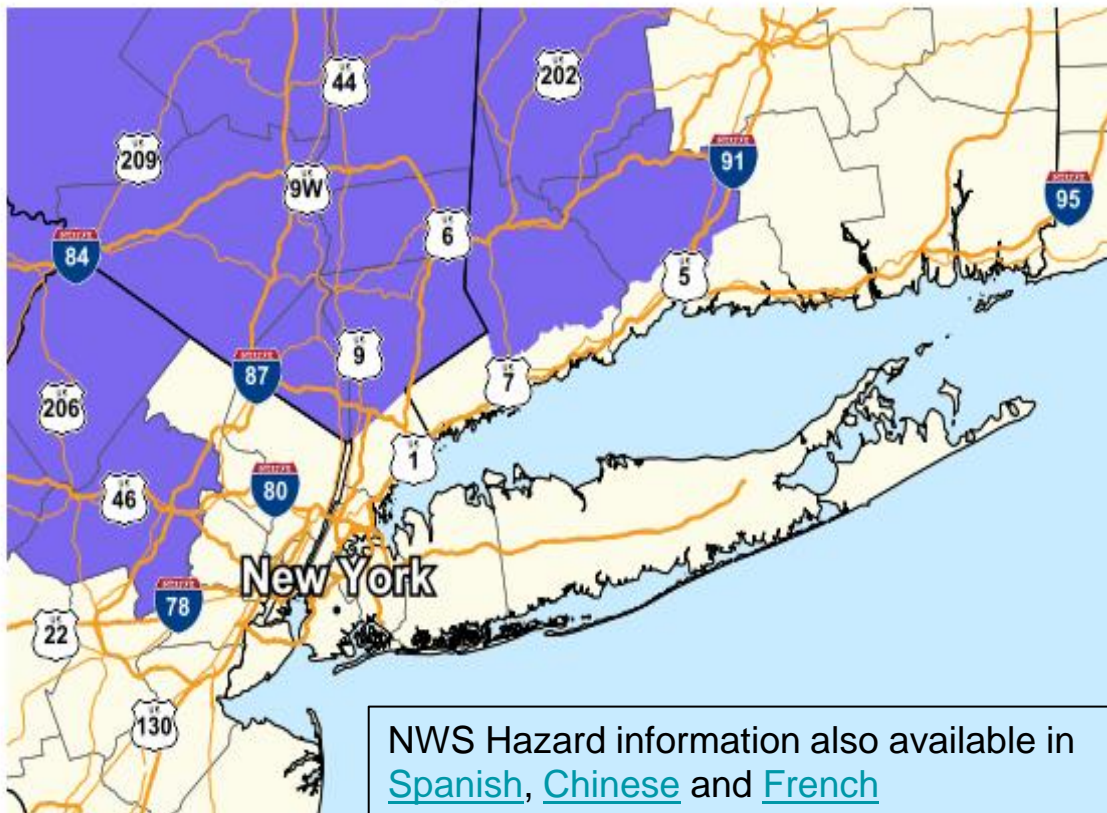

### HAZARDS & IMPACTS

- **Ice Accumulation:** Less than a tenth of an inch.
- **Refreezing:** Areas of refreezing possible Friday night, along with additional light freezing rain and drizzle.
- **Impacts:** Areas of hazardous travel can be expected Friday morning, with the potential for additional icing Friday night.

## Winter Watches Warnings and Advisories

■ Winter Weather Advisory

NWS Hazard information also available in [Spanish](#), [Chinese](#) and [French](#)

### NWS ALERTS

- **Winter Weather Advisory :** Lower Hudson Valley. Potential for the advisory to be extended further south, particularly into interior NJ.

### FORECAST CHALLENGES

- Timing of onset and the changeover to plain rain remains a challenge.
- The exact track of the system will determine whether additional areas need to be included in the advisory.
