HAZARDS & IMPACTS

- **Ice Accumulation:** Less than a tenth of an inch.
- **Refreezing:** There remains the chance of residual moisture freezing early Saturday morning, possibly ending as light snow across the far NW interior.
- **Impacts:** Pockets of hazardous travel can be expected this morning, with the potential for refreezing and potential black ice early Saturday morning.

NWS ALERTS

- **Winter Weather Advisory:** Western portions of interior southern Connecticut, much of the Lower Hudson Valley, and portions of interior Northeast New Jersey.

NEXT BRIEF

This will be the final briefing for this event.
