HAZARDS & IMPACTS

Lower Hudson Valley, Interior NE NJ, and Interior Southern CT

- **Total Snowfall:** 1 to 2 inches.
- **Ice Accretion:** Glaze to a tenth on an inch.
- **Timing:** Snow develops from southwest to northeast after midnight, mixing with sleet and freezing rain late morning, before possibly tapering as plain rain early afternoon.
- **Impacts:** This could result in dangerous travel, with snow covered roads and icing on untreated and elevated surfaces. Expect hazardous travel during the morning commute.

NYC Metro, Long Island, Southern Westchester, and Coastal CT

- **Total Snowfall:** Up to 2 inches.
- **Timing:** Snow develops from southwest to northeast after midnight Thursday, briefly mixing with sleet mid morning, before changing to plain rain as temperatures rise above freezing into late morning.
- **Impacts:** This could result in snow covered roads and hazardous travel during the morning commute, particularly on untreated surfaces.

NWS ALERTS

- **Winter Weather Advisory:** Interior NE New Jersey, Lower Hudson Valley, interior Southern Connecticut from 4 AM Thursday until 1 PM Thursday.

FORECAST CHALLENGES

- Should colder air remain in place a bit longer, a delayed changeover could slightly increase snow and ice amounts.

NEXT BRIEF

By 6 PM Wednesday, or earlier if there are significant changes to the forecast.
