

## **STATUS REPORT - January 2008**

### **Rax Problems**

SERFC and NCRFC are both back up and running again after having hardware problems in December. In January both MARFC and MBRFC suffered hardware problems and are both back up and running as well.

### **OSIP Project: RFC Archive Server Technology Refresh Initiative**

The SON and Project Plan have passed the OSIP Gate1 review. Work on Gate 2 documents has begun and Integrated Work Team (IWT) is in the process of being formed. So far the team has the following members:

Juliann Meyer (lead)	Central Region/MBRFC
Julie DeMargne	OHD
Randy Rieman	OCWWS/HSD
Jim Lane	OS & T/SEC
Brian Doerk	CIO
Robin Radlein	Alaska Region
Chris Holte	OHD/Admin Support

To be determined yet are representatives from Eastern, Southern and Western regions.

### **HOSIP Project: Synchronize RFC Archive DB & IHFS DB Metadata**

A first cut at user documentation for the new applications, run\_raxdb\_sync and start\_raxbase, have been completed and are currently being reviewed. .

### **RAX Discrepancy Reports**

The following DRs are new:

DR#19855 OB8.1: RAX shef\_decode\_pro apps requiring full 7 character SHEF code when it should not  
DR#19874 OB8.2: IVP software not properly constructing observation/forecast pairs  
DR#19883 OB8.2: RAX shef\_decode\_raw apps running slow
