

## **Status Report October 2004**

### **OB5 Delivery**

All applications and files that make up this build have been delivered to OHD/HL for check-in as of October 18, 2004. In addition, any updated or new documents have been posted to the Documentation web page

[http://www.nws.noaa.gov/oh/rfcdev/archive\\_datadoc/index.html](http://www.nws.noaa.gov/oh/rfcdev/archive_datadoc/index.html) .

For detailed list of what is in the OB5 release ... see the Build Information web page <http://www.nws.noaa.gov/oh/rfcdev/docs/raxOB5release2.pdf> .

Postponed to a later build are the following items:

- datview, enhancements and bug fixes; work is in progress.
- New application, archive system version of operational xnav application.
- New and improved bkup\_lev0 script; still investigating the problems that have occurred this past year on ax-nhdr system
- Informix bug fix; still investigating possible solution to “set explain on” sql not working at all sites.

### **New on the RAXUM Web Site**

As the rax systems get more and more usage by the RFCs, some offices have experienced growing pains in that one or more of the dbspaces the archive database resides in have started to fill up. Randy Rieman has put together a very nice write-up on how to add a chunk to existing dbspace. This write-up can be found at <http://www.nws.noaa.gov/oh/rfcdev/docs/addchunk.pdf> .

### **RFC Archive Database Bug/Enhancements List**

A few offices have comment that this list doesn't appear to be up-to-date. Randy Rieman and I have recently coordinated an update of the list. And this new version should be available shortly.

### **Just a Few Words**

My year as team leader is rapidly coming to an end ... and will be over with the OB5 delivery. Donna will be organizing a conference call for the new team members shortly. I hope that as team leader I have been able to keep your offices informed of the activities this team was responsible for overseeing this past fiscal year builds OB3, OB4 and OB5, and various bug fixes. I also hope that your offices felt that their concerns and feedback were heard and responded

to in a timely manner. It was definitely an interesting, educational, and challenging year from my perspective.

Juliann Meyer  
RAXUM Team Leader
