## Preliminary January 2025 Climate Summary for West Central and Southwest Florida

This January we've seen a wide range of temperatures with many days well below normal, 10 to 20 degrees below normal, while a few others were a slightly above normal. On seven of the coldest days freezing temperatures occurred across parts of the Nature Coast while further south some central inland areas have seen some frost with isolated spots near freezing. Overall, the average temperatures so far this month are ranging from about 3°F to nearly 8°F below normal, with some of the official climate sites on track to end up in the Top Ten Coldest for January.

Temperature (F)  
1/1/2025 - 1/27/2025

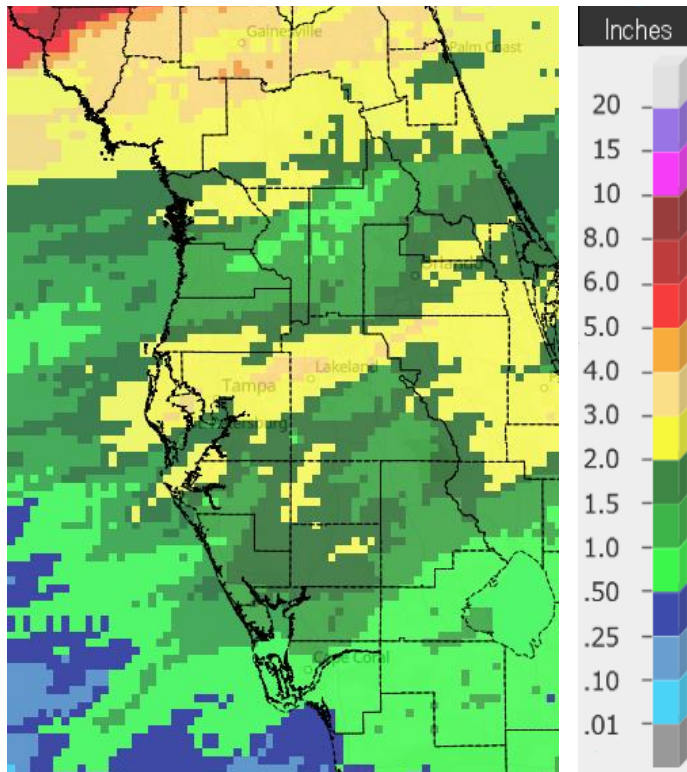

Departure from Normal Temperature (F)  
1/1/2025 - 1/27/2025

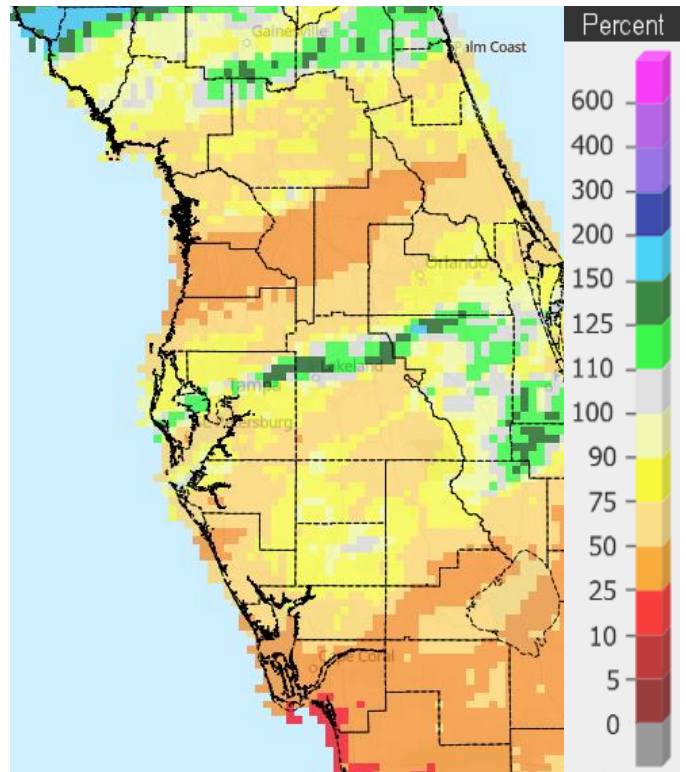

Graphics Source: NOAA Regional Climate Centers

Rainfall has been below normal across most of the region, but there are some small areas around Interstate 4 and the northern Nature Coast that have seen above normal rainfall.

Rainfall January 1-28, 2025

Percent of Normal

Following are tables of the Top Ten Warmest, Coolest, Wettest, and Driest Januarys at some official NWS locations, which include the average/total for this January where available, and the 1991-2020 Normal (average) temperature and rainfall for the month of January.

**CHIEFLAND 5 SE** (Records began in July 1956):
